Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 3-8 and 43, drawn to a slide system including an expansion volume, classified in class 359, subclass 398.

Group II, claims 11-15, drawn to a slide system and sealed package, classified in class 206, subclass 316.1.

Group III, claims 21-24, drawn to a slide system with conduits, classified in class 359, subclass 396.

Group IV, claims 25-31, drawn to a slide system including electrical conductors, classified in class 359, subclass 395.

Group V, claim 32, drawn to a slide system including a piezoelectric transducer, classified in class 359, subclass 396.

Group VI, claims 33-35, drawn to a slide system including a light source, classified in class 359, subclass 396.

Group VII, claims 36 and 37, drawn to a slide system including a light sensor, classified in class 359, subclass 396.

Group VIII, claim 44, drawn to a slide system including an expansion volume and a sealed package, classified in class 206, subclass 316.1.

2. The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 2872

Inventions I-VII (except with regard to Group VIII relative to Groups I and 11 as set forth below) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the inventions clearly have separate utility without the details of the other subcombinations. That is, a slide system with only one or a combination of the other following features, expansion volume, sealed package, conduits, electrical conductors, a light source, or a light sensor would clearly have utility as a slide system.

Inventions VIII and (I and 11) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombinations as claimed for patentability, and (2) that the subcombinations have utility by itself or in other combinations. In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed because the claims to the subcombinations pairwise evidence that the combination is not relying on the details of either subcombination for patentability.

Claim 1 is a linking claim. Claims 2, 9, 10, 16-20, and 38-42 presently recite separate details from the various claims subject to restriction and are therefore neither linking nor generic claims. However, those claims will be examined with any elected Group and elected species consistent with the subject matter of that election.

3. A telephone call was not made to applicant's representative to request an oral election to the above restriction requirement because of the complexity of the restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
